## ORIGIN OF DRAGON ARMY

Since its inception in 1986, MSI has been devoted to building high performance products. Beginning with the world's first 80286 overclockable motherboard in 1987 to the high performance M510C in 2005. From the Lightning series in 2009 to the world's first All-in-One Gaming PC in 2013. MSI's products have always given gaming enthusiasts and eSports professionals the finest experience.

We've dedicated countless hours and committed numerous resources to the eSports community to support the world's most aspiring and talented gamers in their quests. In return, they have provided MSI valuable feedback and insights from their knowledge and expertise that can be seen implemented in every generation of MSI's products. Everything that goes into MSI products, such as Dynaudio high-performance speakers, Killer LAN gaming network technology or SteelSeries gaming keyboards is a direct result of the accumulation of this collective wisdom.

### NOTEBOOK

Sharp and solid in design, MSI notebooks feature exclusive advanced technologies, powerful performance, and incredible speed.
