Very good fit for my hand. The weight is just right and the switches are crisp.

Scroll wheel faulty

Reviewed in the United Kingdom on April 22, 2018

Verified Purchase

Great mouse overall, excellent for gaming at the price (would have been a 5/5 star review). Scroll wheel stopped working 2 months after purchase, scrolling intermittently in opposite directions. Apparently this is a known issue because there are multiple forums describing this problem. Extremely annoying when browsing web pages or word processing. Got another one shipped from logitech costumer care - issue repeated itself 11 months down the line - unfortunate.

Déçu..

Reviewed in France on November 3, 2018

Souris acheter en Avril, plutôt efficace et précise, plusieurs profils de sensibilité disponible, pas excessivement lourde, ni trop bruyante.

CEPENDANT !

6 mois plus tard, la molette fait n'importe quoi, sans utilisation intensive, juste de la bureautique et de la navigation, au vu du prix de la souris c'est un comble qu'un élément aussi basique que ça rencontre des problèmes de conception. même en mettant à jour le firmware... je regrette mon ancienne Logitech G5 qui 8ans après, fonctionne encore parfaitement..

Really wanted to love it

Reviewed in the United Kingdom on October 11, 2020

So I bought the g603 as I currently have the g703 and wanted something similar I could use across multiple machines.

Shape wise it is very similar. It takes two batteries instead of being rechargeable though and I found the weight 'off' and coincidentally its not adjustable. I cant put my finger on it but the mouse felt 'off' to me and so for now I ahve stuff with my g703.

Given the price point I would expect a few things on this mouse:

Rechargeable battery like the g703.

Support more than 2 hosts. It needs 3. Like the MX Master 3.

Dont get me wrong, as a portable office mouse its ok but its all a bit to general and dull

Multiple scroll wheel failures on an otherwise fantastic mouse

I like everything about this mouse. The size, shape and design are all great. The battery life also exceeds anything I have seen before and I haven't had to change the batteries in the year I have had the mice.

Unforautnely, I have been throught two mice and both have had major issues with their scroll wheels.

The first unit failed after 5 months and resulted in double/triple clicks whenever the scroll wheel was clicked.

The first unit was promptly replaced, however the second unit failed after 4 months however the scroll wheel broke completely. It simply stopped clicking and was instead smooth, however this also meant that scrolling didn't work at all.

Same batteries after a year

Reviewed in the United Kingdom on May 22, 2020

All I can say is that this mouse is amazing. The shape and weight of the mouse gave an immediate improvement to my speed and precision in FPS games like Apex and Pubg. I've had no problems with tracking. And it's still going strong with the first set of batteries I put in.
